§ This course sequence is a sample. Actual course sequence subject to change based on advising and student goals.

* These courses need not be taken in the semester indicated; however, it is strongly recommended that they be completed prior to the junior year.

** If CHEM 2443 is taken, CHEM 2444 must also be taken to allow enrollment in MCB 2000 (Biochemistry) if desired (NOT a DGS requirement).

- Total credits depend upon electives selected; a minimum of **120 credits are required for graduation**.
- This plan assumes the foreign language requirement is completed prior to admission to the university. If a language is required, students may elect to take these courses as electives.
- W course requirement: Students are required to take two “W” skill coded courses. DGS 4234W satisfies the “W” in the major. Students **MUST** take the second “W” as a general education or elective.

Please consult with your academic advisor prior to registering for Q courses.

Students can elect to enroll in *Summer/Winter sessions*. Course options can be found at summerwinter.uconn.edu.

Students interested in [Education Abroad](#) should discuss options (semester, winter or summer) with major advisor.

Your academic advisor will work with you every semester to help determine the best sequence of courses specific to your career goals.
